PROFILE INFO

Passionate AI and Machine Learning enthusiast with hands-on experience in developing innovative solutions in NLP, multimodal AI, and predictive modeling. Proficient in designing intelligent systems for real-world applications, including mental health support, advanced chatbots, and customer analytics.

EDUCATION

2022-Onwards

Bachelor's in Artificial Intelligence

- Pursuing comprehensive training in AI, machine learning, deep learning, and data analysis, with hands-on experience in real-world applications.

2020-2022

F.sc (Pre-Engineering)

- Specialized in foundational subjects such as Physics, Mathematics, and Chemistry.

SKILLS

- Machine Learning (Supervised & Unsupervised)
- Deep Learning (CNNs, Transformers)
- Natural Language Processing (NLP)
- LLMs, RAG & Multi-Agent Systems
- Data Handling & Preprocessing

LANGUAGES

- English
- Urdu

WORK EXPERIENCE

AI/ML Intern — Ezitech Institute

Jun 2025 – Sep 2025

- Developed and optimized machine learning models for real-world datasets using Python.
- Implemented NLP and computer vision pipelines for practical AI applications.
- Worked with vector databases and LLM-based architectures for intelligent automation tasks.
- Collaborated in building end-to-end ML workflows including preprocessing, model training, and evaluation.

Projects

Codebase Assistant (AST + RAG)

- Parsed Python code using AST and indexed semantic embeddings in a vector database.
- Enabled natural language querying over large codebases using RAG.

LangGraph Multi-Agent System

- Built a stateful multi-agent workflow with planner-executor architecture.
- Implemented conditional routing and memory-aware task orchestration.

Context-Aware Chatbot (Long-Term Memory)

- Developed LLM-based chatbot with persistent vector memory.
- Enabled cross-session semantic context retrieval.

MMA Vision (Computer Vision)

- Designed real-time motion tracking using deep learning and pose estimation.

Epilepsy Prediction (EEG + Deep Learning)

- Built neural network model for seizure prediction from EEG signals.
